Please note that the use of the term Regions is geographically consistent with our definitions of Regions 4 and 6, but not to imply that these plans are PREPARED by EPA Regional staff.

Our understanding is that each of the BP plans is still in draft form and has not been signed off. As

Lee mentioned, the previous iterations on <http://www.epa.gov/bpspill/waste.html> are the versions BP is currently operating under.

We have generally commented that air monitoring plans should be provided, our recommendations do not yet not appear to have been incorporated in the R6:

Region 4 Plan: (The region is requesting comments from us by the end of the day today):

Region 6 plan:

Here are the two air sampling attachments we have received. You may have seen them already:

regards,
mark

OSWER's Solid Waste folks definitely would like to coordinate the air sampling issues with us.

Jim Michael is coming down to the EOC today to talk with Mathy, and I'll connect with him this afternoon.

The EOC Solid Waste desk officer is going to send us copies of the 2 draft plans (BP developed plans, divided by Regional geography) and OSWER is commenting on them. (EPA is not going through an official approval process, rather we are advising and giving input.) One input that the EOC will provide is that both plans should include air monitoring, whereas only one does now. There may be some additional inconsistencies as well.

There are some initial waste management plans for each Region on the EPA BP Spill page; however, there have been a number of substantial revisions since those were posted.

Stand by for an email from EOC Solid Waste.

Dear Greg, that is great.

Eventually we should make sure that we have modified our air monitoring plans to address these issues -- after we understand them from the RCRA and state perspectives. We did incorporate incineration in our Katrina plans. Don't think we included anything from landfills, but we could check. Phil Lorang was the author of the air monitoring plan.

Thanks, Beth

Beth

Seems that we would want someone from Peter's division to follow this with regards to incinerating the debris. I will send this on the Peter and Bob Wayland to follow also.

Greg

Dear Lee, let me know when you have connected with the OSWER contacts in the EOC and I will reach out to Suzanne and Maria. Thanks, Beth

Dear Beth,

Yes, I think you are on the right track to reach out to the EOC (perhaps with a cc to Suzanne and Maria). I have heard that there is ongoing work on these issues so you should definitely make contact with the Office of Resource Conservation and Recovery. Let me know if you need any more specifics from me, I can probably find the staffer who is working on this pretty quickly if that would help.

Take care,

Barnes Johnson | U.S. Environmental Protection Agency | Superfund | Tel 703 603 8960 | Fax 703 603 9146 | johnson.barnes@epa.gov

Subject: oil spill contacts in OSWER

Dear Barnes, We are starting to work on a couple of papers on the oil spill. The first is on the impact of potentially putting oil spill debris in landfills and the second incineration of the oil spill debris. Who are good contacts for us to work with on these issues?

Our EOC contact was just going to contact the OSWER desk in the EOC, but wanted to make sure that we are covering all of our bases. is that the right approach or should I reach out to Suzanne?

Thanks, Beth
